

## BOIL WATER NOTICE LIFTED

The "Boil Water" notice issued on February 22, 2015 has been lifted after receiving notice that all samples collected tested free of any contaminants.

The City of Liberty Operations Manager of the water system mandated a "Boil Water" notice after a water main breakage caused system pressures to drop below 20 psi. The notice was a precaution to prevent any potential consumption problems. The City of Liberty Water Department remains dedicated to producing water without quality issues, and is concerned at all times for the safety of the consumer.

We wish to thank all of the customers for understanding and helping during the period of time when water quality may have been questionable.

For any questions or information about the notice being lifted, please call 936-336-3684.
